Detailed Action

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while providing enablement for R2 equaling 1 to 2 nitro, or amino groups on the phenyl ring in a meta position, does not reasonably provide enablement for R2 equaling 3 or more nitro or amino groups on a phenyl ring. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The claims as recited are broader than the scope of enablement. The specification lacks direction or guidance for placing all of the alleged products in the possession of the public without inviting more than routine experimentation. The applicant is referred to *In re Wands*, 858 f.2d 731, 737, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988) which includes the incorporation of the 8 factors recited in Ex parte Foreman 230 USPQ 546 (Bd. Of App. And Inter 1986). No compound has ever been synthesized where a phenyl ring can support electron-withdrawing groups such as nitro in the ring in the ortho position.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims ~~8-11~~ are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

resp A. In claim 8, lines 3-4, page 12, the phrase "one or more C1-C6 alkyl, C1-C6 alkoxy, halo, nitro, amino or trifluoromethyl" is indefinite and ambiguous. There is no upper bound on the phrase "one or more". Additionally a phenyl ring cannot support electron-withdrawing groups such as nitro in the ortho position.

L B. In claim 8, line 3, and page 12, the phrase "R2 is R2" is grammatically incorrect.

2 C. Claim 9 is also indefinite, because it is claiming a process according to claim 8 which produces a final product of formula VI, however, it then claims the producing of a different final product of the compound of formula VII.

L D. Claim 9 recites the limitation "formula VII" in line 4. There is insufficient antecedent basis for this limitation in the claim.

2 E. Claim 10 is indefinite, because it is claiming a process according to claim 8, which produces a final product of formula VI, however, it then claims the producing of a different final product of formula VIII.
